While engineers of all kinds have been scouring the civilized world for a brilliant, white and economical light, a machine which produces such a light that is absolutely safe is being made right here in Richmond. The Schmidt Pentan Gas Machine, as made, exhibited and sold by the Cardwell Machine Company, Ninetcenth and Cary Streets, furnishes the best light in the world, because of its brilliant, soft, white color, absolute safety and its great economic feature.

Six fifty-candlepower lights produced by this machine cost a total of one cent an hour, hence the claim that this is the best light in he world.
